

FSK™-100 Fixture Kit
SBF™-100 Fixture Kit
Custom Fixture Solutions

FSK-100 Fixture Kit

*Universal Fixture Kit for Testing
and Screening Modules/Assemblies*

The FSK-100 is designed to mount Modules & Assemblies to Quasi Random Vibration and Temperature Systems. Its innovative design allows it to be used for product development and low volume production screening as well as failure analysis.

FEATURES

- Four (4) base plate assemblies in each kit
- Clamping bars from 10" to 14.2" (metric version available)
- Positive clamping scheme allows maximum vibration transmissibility

SBF-100 Fixture Kit

*Universal Fixture Kit for Testing
and Screening PC Boards*

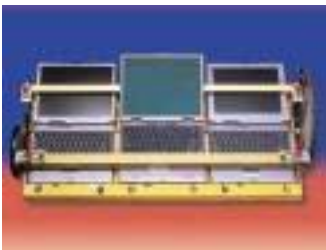

The patented SBF-100 is designed to mount virtually any size/shape PC board to Quasi Random Vibration and Temperature Systems. Its innovative design allows it to be used for product development and low volume production screening as well as failure analysis.

FEATURES

- Eight (8) individual clamp assemblies in each kit
- Slotted base in each assembly for quick adjustments
- Unique swivel clamp for any board configuration
- Accepts board thickness from .032 to .196 inches (metric version available)
- Positive clamping scheme allows maximum vibration transmissibility
- Mounting scheme allows effective air flow for maximum thermal response

Custom Fixture Solutions

Screening Systems, Inc. utilizes the most advance engineering technology to develop innovative fixtures to meet any testing requirement
